Lumi Hyväri

Fullstack Engineer | JavaScript | Student @ Chas Academy
Stockholms län, Sverige

Sammanfattning

Security Awareness. Software Development. Open-mindedness.
I am proficient in software engineering using Javascript, C/C++, and Python. Currently, I am studying Javascript Fullstack Engineering @ Chas Academy to formalize my prior personal experience using Typescript, Bootstrap, HTML/CSS, Docker, Node.js, Express.js, MySQL, and more. I am also enthusiastic about Linux system internals and have prior personal experience in system administration. In my spare time I research into different topics such as cyber-security and how software and hardware work. I have found an artistic joy in digital design creation using Affinity Design. For more information, see <https://lumiwyou.github.io>

Erfarenhet

Transcom
Kundtjänstrepresentant
2022 - 2023 (1 år)
Borås, Västra Götalands län, Sverige
